

Diedrich Prigge V, Ph.D.

Construction Management
Assistant Professor, College of Engineering
T: 951-552-8785
E: dprigge@calbaptist.edu

Dr. Diedrich Prigge V earned his B.S. in Construction Management from Del E. Webb School of Construction (DEWSC) at Arizona State University in 2002, followed by his M.S. in 2010 and his Ph.D. from the same University in 2013. In fall of 2013, Dr. Prigge joined the CBU College of Engineering as an Assistant Professor in the Construction Management Program.

Prior to coming to CBU, he enjoyed an 8 year professional career in the construction industry. He worked at one of the largest general contracting companies in the western United States in every aspect of the job including estimator, scheduler, engineer, and project manager. He eventually left to start his own company in the high-end custom home market. Years later, Dr. Prigge put his company on hold to pursue his ministry calling where he helped start a successful church that grew from 6 to over 2,000 people. His role as a pastor expanded into college ministry at Arizona State University where he has been involved for the past 8 years with college Younglife.

Dr. Prigge taught for four years at his former alma mater (DEWSC) in the School of Sustainable Engineering and The Built Environment as a Faculty Associate.

Along with his passion for teaching and pastoring, Dr. Prigge has enjoyed over 9 years of experience in leading volunteers on numerous mission trips all over the globe. Most of these trips include an element of construction which helped to spark his research interests for both his MS and PhD in volunteerism, including leadership and maximizing the productivity of a volunteer construction workforce. Dr. Prigge now sits on the board of directors for the largest Christian organization in El Salvador.

As the construction industry touches every sector of the global market and economy, there is no better opportunity to provide competent and qualified graduates from CBU. Dr. Prigge believes that aligning construction training with industry needs will not only support maximum transfer of acquired knowledge to the construction sector but also provide a competent workforce as it relates to the current and future needs of the industry and global markets.

Dr. Prigge was born and raised in Phoenix, Arizona. He and his wife Christine have a daughter.

*A gentle answer turns away wrath, But a harsh word stirs up anger.
Proverbs 15:1 NASB*
